# DreamBox Learning® Math Actionable Insights and Reporting

With DreamBox Learning®, your students gain a deeper understanding of math and you gain a deeper understanding of your students.

Quickly analyze learning trends, gaps, and growth to immediately differentiate instruction.

Easily discover strategic opportunities to support student learning with real-time insights and access relevant, job-embedded professional development.

MAKE INFORMED DECISIONS USING REAL-TIME DATA.

DreamBox's continuous, embedded formative assessment supports personalization of path, pace, scaffolding, and sequencing for every learner. DreamBox assesses all the strategies, work, and solutions of each student. By using real-time data both formatively and summatively, DreamBox Learning's Insight Dashboard™ provides educators with insights and learning data to make the best instructional choices for their students at each moment of the day.

Districts and schools

Easily monitor the positive impact DreamBox is having on student learning outcomes. Specific, measurable, and actionable data about student growth, proficiency, and implementation success helps leaders understand what matters most about student learning and make informed decisions.

Classrooms and students

DreamBox offers insights for every educator to know when and how to differentiate, with tools to challenge students whether they are currently performing above, at, or below grade level. Teachers can use data to inform lesson planning, create strategic groups of students, identify learning gains and areas for growth, and determine how prepared the class will be for upcoming lessons and units. Educators may easily monitor progress to make data-informed intervention decisions.
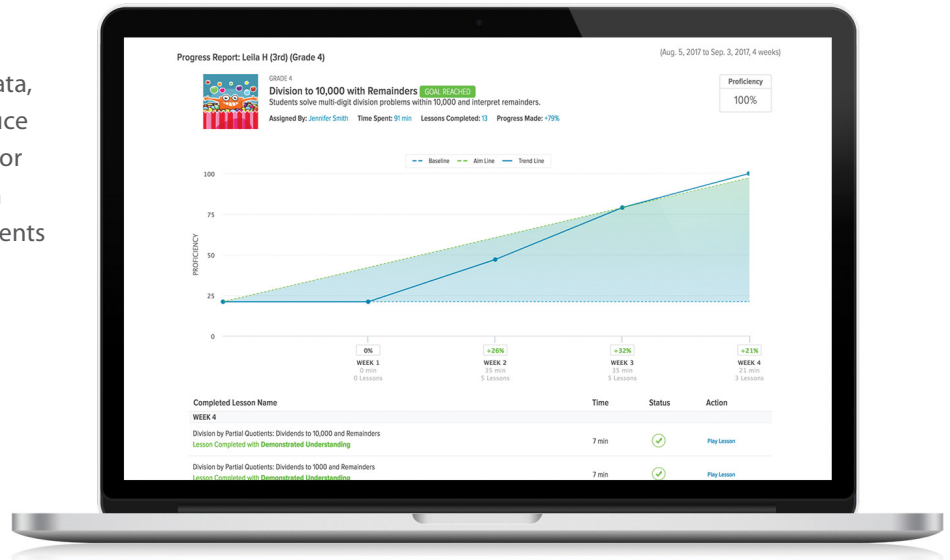

Families and parents

Facilitate strong home-school connections by initiating meaningful conversations about student learning. Parents and learning guardians can access in-the-moment information about what their students are working on and where they may require additional support.

CREATE DATA-INFORMED, DIFFERENTIATED ASSIGNMENTS USING ASSIGNFOCUS™.

DreamBox's AssignFocus™ empowers teachers to personalize DreamBox lessons for every learner based on what's happening in their classroom. Using rich, student proficiency data, educators can create assignments to introduce concepts, reinforce skills, address gaps in prior knowledge, prep for assessments, and much more. Furthermore, they can create assignments that align to:

- DreamBox's curriculum
- State and regional standards
- Topics from popular print programs, including Eureka Math, EngageNY, and Contexts for Learning Mathematics

ACCESS IMMEDIATE, JOB-EMBEDDED PROFESSIONAL DEVELOPMENT.

MyFlexPD™ is the on-demand component of DreamBox's complete FlexPD™ solution. MyFlexPD engages teachers in a dynamic, self-paced experience in which they use real-time student performance data as a starting point for their own professional learning. Not only does it provide a safe environment for independent learning, but MyFlexPD also empowers teachers to access the valuable content they need, when they need it. The result is relevant professional learning that teachers can immediately apply in their classroom to improve student outcomes.

> " With DreamBox, we can go in and make an assignment for our students that meets them right where they are. "

ABOUT DREAMBOX LEARNING® MATH

DreamBox Learning is the only K–8 digital math program powered by students, built by and for educators, and independently proven to positively impact student achievement. Both during and between lessons, DreamBox dynamically adapts and differentiates in real time based not only on students' answers, but also on how they solve problems. By automatically and continually supporting all students at their right level, DreamBox is a powerful partner in every classroom, school, and district. Along with actionable reporting and tools that empower classroom differentiation for all learners, DreamBox also gives teachers content-specific professional development relevant to the math their students are learning, provides administrators with insights about how all students are progressing, and enables strong connections between home and school.
