Implementation Checklist

dreambox® LEARNING

DreamBox is a digital math platform that complements your math curriculum and provides students with lessons and games that foster the development of math skills and understanding. DreamBox utilizes an intelligent adaptive engine to provide personalized, engaging math experiences for each student based on their strengths and needs. As students complete lessons, DreamBox provides educators with actionable insights and data on student progress. For more information on how DreamBox supports you and your students, see Why DreamBox?

DreamBox lessons are designed to promote learning through meaningful engagement and productive struggle. **To maximize growth, students should complete at least 5 lessons each week**. Use this checklist to guide your planning as you introduce and utilize DreamBox in your classroom this school year.

GETTING STARTED: THE FIRST MONTH

- ❏ Log in to the DreamBox Insights Dashboard.
- ❏ Begin the self-paced onboarding course, *Getting Started with DreamBox*.***
- ❏ Register to join a live webinar to learn how DreamBox differentiates lessons for your students and best practices for continued success.***
- ❏ Help students log in on iPads or computers.
- ❏ Introduce DreamBox to your learners. Remind students to work independently, use headphones with the volume on, and to only use the virtual manipulatives (rather than using a pencil and paper).
- ❏ Encourage students to log in and complete lessons within the first two weeks of school.
- ❏ Incorporate time into your classroom schedule and routines for students to complete at least 5 lessons each week. This generally takes about 60 minutes--which can be done during two 30-minute sessions or three 20-minute sessions.
- ❏ Communicate with families that you will be using DreamBox in your classroom this year and will share information about home usage.

*** Click on the DreamBox icon in the right corner of the DreamBox Insights Dashboard to access resources.*

DIVING IN: THE NEXT 30-60 DAYS

- ❏ Use the DreamBox Insights Dashboard to monitor student usage and identify students who may need support.
- ❏ Celebrate success as students complete lesson goals. For some helpful tools, visit *DreamBox Quick Links* by clicking on the DreamBox icon in the right corner of the DreamBox Insights Dashboard.
- ❏ Connect with families to share student logins, and encourage them to set up family accounts.

DEEPENING PRACTICE & PROMOTING GROWTH: BEYOND THE FIRST 60 DAYS

- ❏ Continue to encourage students to meet their goals for learning and lesson completion.
- ❏ Use the DreamBox Insights Dashboard to inform instruction. Consider assigning specific lessons for students to complement classroom learning, help fill in gaps in understanding, or provide enrichment.
- ❏ Use DreamBox usage and insights as a springboard for conversations with families about student learning and growth.
